

AudioWorks

An interactive tool for sound analysis and intuitive visual manipulation of sound effects.

Developed by Jeff Gregorio, Youngmoo Kim, and the Music and Entertainment Technology Laboratory (MET-lab) for the Drexel University Summer Music Technology (SMT) Program.

Acknowledgements

This application implements audio filters using NVDSP by Bart Olsthoorn, available at github.com/bartolsthoorn/NVDSP.

The Summer Music Technology program is hosted annually at the ExCITe Center of Drexel University. For more information, visit drexel.edu/excite.
